 Food scrap recovery and composting

Queen City Commons' mission is to help build a regenerative local system through composting and connecting people, land, and community. We partner with local farms and community gardens to process and compost the organics we collect, ensuring that the nutrients from your food scraps help build healthy soils and grow food right here in Cincinnati.

We offer two tiers of event composting to choose from. Event collection provides food scrap collection bins and pickup at the event venue. Event collection with staff ensures that food scraps are sorted properly (eliminating possible contamination) and provides support to catering staff during the event.

Event collection	Event collection with staff
We provide: <ul style="list-style-type: none"> - Pre-event coordination with caterer. - Collection bin(s) - Pickup and dropoff of collection bin(s). 	We provide: <ul style="list-style-type: none"> - Everything included with event collection. - Staff member to help coordinate food scrap separation during the event.
You take care of: <ul style="list-style-type: none"> - Connect us with caterer and event planner. - Catering staff willing to separate food scraps during event. 	You take care of: <ul style="list-style-type: none"> - Connect us with the caterer and event planner.
\$150 + \$50 refundable contamination deposit	\$250
